Case Studies

Location Arundel, Gold Coast Qld.

Client – Residential.

Type of wall constructed – Windsor concrete blocks.

Brief description of work completed.

The owner of this property wanted to rectify the existing leaning old timber wall. They also wanted a new Colorbond fence to be installed above the new wall. We put a couple of options to the owner. They chose a Windsor concrete block wall.

See picture below.

The Windsor concrete block wall was a good economical solution for this job. It gave a neat clean, fresh finish down the side of this home. I can guarantee this wall will not rot or be eaten by termites. We then constructed the Colorbond fence on top of the new retaining wall.
