

Case Studies

Location - Pacific Pines State High School, Gold Coast Qld.

Client - Northbuid constructions pty ltd.

Type of wall constructed - Boral Keystone, reinforced earth geogrid construction.

Brief description of work completed.

An extension to the school was carried out by Northbuild constructions who as part of their job was to extend existing on site retaining walls.

Australian Retaining Walls was awarded the job of constructing the abovementioned retaining walls. Approx. 160 square metres up to 3 metres high. These walls were integrated seamlessly into the existing walls. These interlocking systems lend themselves to producing aesthetically pleasing curved walls as you can see below.
